**Titan Introduces New PowrLiner Series Line Stripers**  
*Operators now have more control and comfort than ever*

MINNEAPOLIS — March 16, 2015 — Titan™ has upgraded its PowrLiner™ Series models 4955, 6955 and 8955 line stripers with new features that deliver more control, convenience and comfort. These hydraulic PowrLiner models are for striping pavement, grass or turf, and are designed for heavy duty, long-term use on medium, large and giant scale striping projects.

Included in the new design is the PowrCenter™ dashboard that delivers convenience that only Titan offers. The PowrCenter puts the throttle and pressure control at the operator's fingertips, eliminating the need to stop striping to make adjustments. The PowrCenter also includes features like a handy storage tray, pressure gauge, cup holder and a 12 volt plug-in for charging smartphones or iPods.

The new PowrLiner models also feature the SmartArm™ system – a gun boom that folds out for quick set up and folds up for easy transportation and storage. The SmartArm also has two ways to adjust gun height and fan pattern width. Users can simply crank the handle for changes to both guns, or use the independent control to adjust each gun separately, making precise line settings a snap.

In addition, these PowrLiner models have new ergonomic features that make spraying more comfortable for operators. The new handlebars have three points of adjustment and fit any body size, shape or height. Coupled with the PowrLiner's new swing back design, the striper feels lighter and is easier to use, reducing overall fatigue.

“These new PowrLiner Series models were rebuilt from the ground up with proven technologies designed to exceed the expectations of our customers,” said Chuck Flower, product manager for Titan. “By adding the SmartArm, PowrCenter and ergonomic features, operators have more control and comfort than ever before.”

Large field and pavement marking contractors, property managers and maintenance professionals rely on Titan's PowrLiner Series stripers for dependable, precise performance. They are capable of striping 106 to 800 linear feet per minute, which is up to 60 percent greater than competitive line stripers. And now, these PowrLiner Series models have been enhanced with smart features that give operators more control, convenience and comfort than ever before.
