### **Titan® Introduces the Elite® 3500 72V Battery-Powered Paint Sprayer**

MINNEAPOLIS — February 17, 2025 — Titan has announced availability of the new [Elite 3500 72V](#), a battery-powered paint sprayer that combines the durability of the Titan Elite Series with performance that closely matches a Honda® GX120 gas engine.

The Elite 3500 72V delivers a consistent finish, is easy to operate and is field serviceable – no matter where the job. It's a versatile, direct drive sprayer featuring proven Titan Elite Series technologies that contractors have trusted for many years. It has zero emissions and is quiet, which can extend working hours and usage in noise restricted areas.

With Titan PermaStroke Technology®, the Elite 3500 72V has no piston, packings, cylinder, or clutch to wear or replace. Maintenance is minimal with two easily replaceable wear parts, the inlet and outlet valves, which can be quickly changed out in the field. The sprayer provides top performance at a wide range of pressures, from 300 to 3,300 psi, even when using smaller tips or spraying coatings prone to shearing. Like all Elite Series sprayers, it is backed by Titan's WearGuard® Elite Lifetime Fluid Pump Warranty.

The [Honda eGX](#) is an advanced electrified motor. In contrast with gas-powered engines, it is extremely quiet with reduced vibration for an ultra-consistent finish. It features a high efficiency three-phase brushless DC motor for maximum performance and reliability. The eGX motor includes a removeable lithium-ion battery that can easily be swapped out, reducing downtime when compared to recharging electric corded sprayers via an electrical outlet. It takes less than an hour to recharge a Honda eGX battery.

"The new Elite 3500 72V offers contractors a lifetime of durability," said Chris Noto, product director for Titan. "It combines proven Titan technologies with the power and performance of the Honda eGX motor with rechargeable batteries for GX120 performance that's quiet and eco-friendly."

Key features and benefits include:

- PermaStroke Technology delivers top performance at pressures from 300 to 3,300 psi and when using small or large tips.
- Powerful Honda eGX brushless DC motor closely matches the performance output of a conventional Honda GX120 gas engine.
- FlatLine Pulsation Dampener™ eliminates all pressure fluctuations and deadband in the system for smooth operation and consistent finish.
- No piston, packings, cylinder, or clutch to wear or burn out.
- Sureflo™ Pusher Valve makes priming easy.
- Fluid pump is backed by Titan's WearGuard Elite Lifetime Warranty.

- Perfect for spraying coatings prone to shearing.

Designed to spray up to 200 gallons per week, the Elite 3500 72V applies stains, lacquers, enamels, latex and block fillers. It comes standard with a Titan RX-Pro® gun, 517 HEA tip, 50-foot airless hose, Honda eGX battery and charger. Additional batteries can be purchased separately.

The Titan Elite 3500 72V is available in the U.S. and Canada at professional paint and equipment retailers. MSRP is \$13,332. Visit [www.titantool.com](http://www.titantool.com) for more information.

#### **About Titan**

A leader in spraying technology, Titan manufactures and markets a full line of professional-grade sprayers for applying a variety of coatings. Titan products include airless and air powered paint sprayers, fine finishing sprayers, sprayers for applying texture, roofing, corrosion control, protective coatings, and line strippers for sports fields and asphalt. For nearly half a century, contractors and maintenance professionals have relied on Titan products for world-class, end-to-end solutions that are dependable and easy to use.
