MINNEAPOLIS — March 9, 2015 — Titan introduces the new FlexSpray™ HandHeld, the multi-tool for painting pros with a unique combination of power, control and versatility. The FlexSpray Handheld delivers the power of an airless sprayer with the control of an HVLP. It's a highly versatile tool that is capable of spraying all types of coatings for interior, exterior and fine finishing jobs.

The FlexSpray is powered by JetForce™ Technology – a variable speed turbine powerful enough to spray unthinned latex, and nimble enough to spray lightweight coatings like lacquer and stain with ease. It achieves a high gloss finish on cabinets and furniture, special effects finishes for multi-color coatings, and will match a roller nap finish on existing drywall when spraying unthinned latex.

The FlexSpray HandHeld features a Quick Change System, allowing the user to change front ends with a simple twist. In a matter of seconds, one front end can be disconnected and another reconnected, which is perfect for larger jobs, or fast color changes, and end of job cleaning. Each front end is a sealed system that can store paint, eliminating cleaning between jobs or while waiting for coatings to dry.

The FlexSpray HandHeld has two front end options. The patented FlexFinish™ front end is built to tackle heavy coatings like latex, enamel and acrylic with the speed of a 413 tip with minimal overspray. The FineFinish front end is optimized to apply coatings like stain, lacquers and urethanes with precise control and a flawless finish, yielding results similar to a four-stage HVLP. In addition, both front ends are compatible with water and solvent-based coatings.

“Our new FlexSpray HandHeld is like having two sprayers in one,” said Jim Handzel, senior product manager for Titan. “It gives you all the benefits and power of airless, and with a quick change of the front end, it doubles as a fine-finish sprayer that produces a professional HVLP-style finish.”

Titan's FlexSpray HandHeld is a long-life tool that's designed for simple maintenance. Wear parts like pistons, cylinders and prime valves are non-existent in this sprayer, and it has a lifetime of more than 4,000 quarts of paint. The FlexSpray HandHeld is a portable and light-weight system for professionals who spray a variety of coatings, like property maintenance specialists, residential painters, and general or light commercial contractors.

Built tough by Titan with 10 times the life of other hand-held sprayers, the FlexSpray HandHeld makes painting faster and easier for professionals who want to increase profits.

The FlexSpray HandHeld is available at Sherwin-Williams stores in the U.S. and Canada.
