**Titan™ Expands TR<sup>1</sup> Line of Tips: Now Available for High Pressure Sprayers**  
*Best Performing Fan Pattern and Longest Lasting Orifice Available Today*

MINNEAPOLIS — January 22, 2015 — Titan™ is expanding its line of premium TR<sup>1</sup> tips – one of the industry’s best performing lines of reversible airless tips. Featuring the same proven technology, Titan is now offering reversible TR<sup>1</sup> tips for high pressure sprayers (5,000 to 7,700 psi) built to handle heavy viscosity materials such as specialty coatings for corrosion control, cold applied roofing, waterproofing and marine protective coatings.

Titan TR<sup>1</sup> High Pressure tips are designed for spraying the heaviest coatings at high pressures and are designed to exceed contractor expectations for finish and performance. What makes TR<sup>1</sup> tips different is technology that enables a consistent fan pattern width – from the first gallon to the last. They feature long-lasting orifices that spray a uniform coating thickness for the life of the tip, wasting less material. And contractors know that when there are fewer passes and less wasted material, the profits are higher.

“Our TR<sup>1</sup> tip cut technology is second-to-none,” said Chris Noto, product director for Titan. “We developed these tips and the technology behind them so the fan pattern stays the same width throughout the life of the tip, thus performing better than all others.”

Titan TR<sup>1</sup> High Pressure tips are compatible with Titan PowrCoat™ Series sprayers, as well other industry high pressure gas powered and pneumatic sprayers. For more information, visit [www.titantool.com](http://www.titantool.com).

**About Titan**

As a leader in spraying technology, Titan manufactures and markets a full line of professional-grade sprayers for applying a variety of coatings and materials. Titan products include airless and air powered sprayers, fine finishing sprayers, sports field and pavement marking sprayers, and sprayers for applying texture, roofing, corrosion control and protective coatings. For nearly half a century, contractors and maintenance professionals have relied on Titan products for world-class, end-to-end solutions that are dependable and easy to use.
