**Titan™ TR<sup>1</sup> Tips are Now Available for Line Stripers**  
*Longest Lasting Orifice and Best Performing Fan Pattern Available Today*

MINNEAPOLIS — February 2, 2015 — Titan™ is introducing the new TR<sup>1</sup> Line Striping tip, expanding its line of premium TR<sup>1</sup> tips – one of the industry’s best performing lines of reversible airless tips. The new TR<sup>1</sup> Line Striping tip is specifically designed to exceed the expectations of line striping customers for finish, performance and ease of use.

Titan TR<sup>1</sup> Line Striping tips spray razor-sharp lines with less overspray and splattering than competitive line striping tips. What sets Titan’s TR<sup>1</sup> tips apart is technology that enables a consistent fan pattern width – from the first gallon to the last. The tips feature a long-lasting orifice that sprays a uniform mil thickness for the life of the tip, consistently producing precise lines and professional results. And line striping business owners and operators know that precise lines yield superior striping jobs and satisfied customers. Also, with the TR<sup>1</sup> Line Striping tips, Titan has eliminated the math previously required for reading tip sizes (417 = 4” stripe, .017-inch), making it easier for operators.

“We designed our premium line of TR<sup>1</sup> tips so the fan pattern stays the same width throughout the life of the tip,” said Brent Jane, product manager for Titan. “The tip cut technology that enables this is second-to-none, performing better than all others.”

Titan TR<sup>1</sup> Line Striping tips are compatible with Titan PowrLiner™ Series sprayers, as well other industry gas powered airless line strippers. For more information, visit [www.titantool.com](http://www.titantool.com).

**About Titan**

As a leader in spraying technology, Titan manufactures and markets a full line of professional-grade sprayers for applying a variety of coatings and materials. Titan products include airless and air powered sprayers, fine finishing sprayers, sports field and pavement marking sprayers, and sprayers for applying texture, roofing, corrosion control and protective coatings. For nearly half a century, contractors and maintenance professionals have relied on Titan products for world-class, end-to-end solutions that are dependable and easy to use.
